Authors:

Yashar Deldjoo, Fatemeh Nazary, Arnau Ramisa, Julian McAuley, Giovanni Pellegrini, Alejandro Bellogin, and Tommaso Di Noia. .

Published:December 2021

ACM Comput. Surv. 37, 4. Article 111 (December 2021).
<https://doi.org/10.1145/nnnnnnn.nnnnnnn>

The textile and apparel industries have grown tremendously over the last years. Customers no longer have to visit many stores, stand in long queues, or try on garments in dressing rooms as millions of products are now available in online catalogs. However, given the plethora of options available, an effective recommendation system is necessary to properly

sort, order, and communicate relevant product material or information to users.

Paper4: A Review on Clothes Matching and Recommendation Systems based on user Attributes

Authors:

Atharv Pandit, Kunal Goel, Manav Jain, Neha Katre.

Recommender systems provide users with product information and suggestions, which has gradually become an important research tool in e-commerce IT technology, which has attracted a lot of attention of researchers. Collaborative filtering recommendation technology has been

the most successful recommendation technology so far, but there are two major problems-recommendation quality and scalability.
